

Analogic Labs
Creative Publishing
for a Modern World

Special Session:
The 6th Annual North American Symposium on
Methodologies, Theory, and Information

<http://www.analogiclabs.com>

Meeting room: **Salon 12** Date: **Sunday, July 10th, 2005** Time: **5:00 pm**

Refreshments will be provided.

WMSCI attendees are invited to attend this **free** special session, featuring **invited talks** from industrial and academic **leaders** in several of today's most important emerging fields. Learn about **new technologies** and interact with colleagues from **all over the world**. Talks include:

Harnessing Byzantine Fault Tolerance Using Classical Theory

Dr. Thaddeus Westerson, *Institute for Human Understanding*

Synthesizing Checksums and Lambda Calculus Using Jog

Dr. Mark Zarqawi, *American Freedom University*

On the Study of the Ethernet

Franz T. Shenkrishnan, Ph.D., *Network Analysis Laboratories*

The **Annual North American Symposium on Methodologies, Theory and Information** is Florida's most **prestigious** and **topical** multi-conference session combining these three fields. Such a multi-disciplinary **approach** to invited talks is **always** informative, educational, and entertaining, and this session will be **no exception**. Come for the **refreshments**, stay for the **stimulating technical content!**
